

ECONOMIC OUTLOOK FOR SINGAPORE IN 2012

**All CFE Candidates Will Qualify
For "100 CFE POINTS"**

With the US and Eurozone economies stuck in their economic quagmire, the global economy is clouded with uncertainties. Small and open economies such as Singapore are probably most at risk. As such, it is important for Singapore businesses to have a good grasp on how external and domestic economic situation will pan out in the year ahead. In this regards, an assessment will be made with reference to the outlook of the US, Eurozone and Asia economies. Implications will then be drawn on the economic performance of Singapore in 2012. An analysis on the inflation, labour market, interest rate, exchange rate as well as the economic impact of the recently announced fiscal budget will also be presented.
